

14th Critical Care Nephrology Course for Health Care Professionals (April 2018)

Introduction

Renal Replacement Therapies (RRT) are common and crucial to critically ill patients having severe acute kidney injury. Modes of RRT are different from those prescribed for patients with chronic kidney diseases. This one and half day programme consisting of lectures and workshops is organized for all interested healthcare professionals to update their knowledge in this field.

Organizer

Department of Intensive Care, Pamela Youde Nethersole Eastern Hospital

Objectives

To provide updated knowledge on critical care nephrology
To demonstrate the operation of different RRT equipments/consumables used for different modes of therapy

Lecturers / Facilitators

Medical and nursing experts in Intensive Care and Renal specialties from various centres

Target Participants

Doctors, nurses and allied health professionals who are interested in Critical Care Nephrology
Priority will be given to health care professionals who are working in Intensive Care Units, Coronary Care Units, Renal Units or other critical care wards,
