

Basic Echocardiogram Course in Hemodynamic Assessment and Valvular Diseases (ECHO II)

Lecture & Hands-on Sessions

17 Aug 2019 (09:00 - 17:40)

Multi-disciplinary Simulation and Skills

Centre (MDSSC), 4/F, Block F,

Queen Elizabeth Hospital

**Application
Deadline:
3 Jul 2019 (Wed)**

Course Design:

The training program consists of one half-day didactic lecture and one half-day hands-on session by cardiologist(s) or specialist(s) experienced in Echocardiogram.

Objectives:

1. To provide fundamental knowledge and hands-on skills on hemodynamic assessment in acute care setting using echocardiography
2. To assess patients with valvular pathologies and other differential diagnosis of cardiac murmurs

CME/ Training Points:

Pending

Content:

1. Basic principles of Doppler Echocardiography
2. Haemodynamic assessment by Echo in acute care setting
3. Assessment of aortic valve disease
4. Assessment of mitral valve disease

Preferred attributes:

1. Attended Basic Echocardiogram Course in Cardiac Emergencies and Triage (ECHO I) organized by MDSSC
2. Currently works in the Department of Accident and Emergency, Anaesthesia, Cardiothoracic Surgery, Intensive care, Medicine and Family Medicine.

Instructions to Applicants

- This course is free of charge for HA full time staff. For interested colleagues, please fill in the attached application form and return the completed form to geh_mdssc@ha.org.hk or fax to 3506 7045 on or before 3 Jul 2019 (Wed) at 12:00 noon.
- The application is on a first-come-first-served-basis and will be closed once the pre-set quotas are filled.
- The Steering Committee on Echocardiogram (ECHO) Course reserves the final right to select the most appropriate applicants for the course. For enquiry, please contact Ms. Scarlett Chan at 3506 5265.
